Mail Bid Sale Nine - 10 & 11 September 1991

Price \$15. Prices Realized \$5.

Dear Fellow Collector,

Welcome back to our mail bid sales of fine quality exnumia. We are pleased to offer a wide variety of tokens, medals and World's Fair items in this sale. We feature the Robert C. Kraft Collection of Wisconsin Civil War Tokens, the largest and finest collection ever assembled. To do this fantastic collection justice, we have created a separate 112 page reference catalog on Wisconsin CWT. That catalog includes the completely revised Fuld catalog with new rarities, new listings and other corrections. Each of the 540+ pieces is pictured obverse and reverse. Full grade descriptions and estimates (as also shown in this sale catalog) are included. In addition, pedigree and rarity comments are included in the WI CWT catalog. That catalog concludes with several new and reprinted articles. Call today to order your copy of this limited edition reference, only \$15.

Our other main feature in this sale is the William Bridge Collection of Silver Indian Peace Medals, the largest and finest collection ever offered at unreserved mail bid sale. A number of previously unknown types are included. These rare and important American medals are sure to attract interest.

In addition we also offer the Fuld Illinois CWT collection, a large sutler token and note collection, a large grouping of Bryan money, 2100+ Siamese gambling tokens, the largest known collection of metal charge cards, a wide grouping of choice world medals and tokens, a massive grouping of choice Columbian Exposition material and much other material. Look over the catalog carefully, and don't forget to check the separate comprehensive index, the most detailed ever offered. Also check the bidding rules for our new interactive FAX and computer bidding options.

SUBSCRIBE: Catalogs are sent by subscription ONLY. The next two sale will be sent for only \$15. Just check the bidding form, and we will bill you. Happy Collecting!

TERMS of SALE -- PLEASE READ CAREFULLY!!

1. **Your satisfaction is our goal.** While mail bid sales are not approval sales, we will work with you to correct any mistakes on your or our part. Please write or call immediately should any difficulty, problem or disagreement arise. We will cheerfully refund your purchase price, full return postage and send a \$10 credit on any future purchase for any misattributed lot. We try very hard to have all pieces correctly attributed, and apologize for any errors. **We DO appreciate your business!**
2. By submitting bids you agree to the following terms of sale. **There is NO buyer's charge!**
3. This is a mail bid sale of tokens, medals, badges, World's Fair exnumia and other collectibles. Your bids are accepted per lot, with the winning bidder receiving the item at a small increment over the second high bid.
4. The Bidding Deadlines are
 Lot 101 -1000 8pm on 10 September 1991.
 Lot 1001- 8pm on 11 September 1991.
Call your bids in at (815) 226-0771. See the BID SHEET for our FAX number and alternate phone number. Bids will be accepted past the closing time until a half hour passes without any calls. Please call EARLY! Bids must be RECEIVED by the closing date. **Daily opening bids** will be available to telephone callers, between 3 and 10pm, September 1-11. We do NOT reveal top bids. Opening bids are the minimum increment over the second high bid. The opening bids are ONLY available to bidders who have already bid on that lot, at least 70% of low estimate (100% for callers on the last days of the sale). Please note this encouragement to bid early. To avoid numerous closing night call-backs, which we feel are unfair to underbidders, only the opening bids as of 3pm the closing days will be available (subsequent bids will not be revealed!).

Special NOTE: You may bid ANY amount, but once you have gotten the opening bid, no bids below that amount are accepted. We regret we are unable to cancel any bids made after 2 Sept.

SPECIAL INTERACTIVE FAX Bidding.

We are accepting FAX bids (see BID SHEET for fax number), as well as bids on the computer networks CompuServe (70421,2176) and Prodigy. For only \$5 (waived on purchases over \$500), we will fax/send detailed information on your bids, opening bids, totals, etc. on Friday, September 6th, and the following Monday, Tuesday (and Wednesday) to your fax or computer. This applies to bids of at least 70% of low estimate. This special offer is designed to allow you to increase or add bids, based on the competition.

No FAX? If your bids have been received by 31 August (and again by 7 Sept), we will MAIL back a preliminary report (at no charge). Bid early and find out how your bids are doing, before the sale closes.

5. All items are guaranteed to be genuine. Should any item prove to be a copy, replica or counterfeit, it may be returned at any time for a full refund. Lots sold "AS IS" are not returnable. No lots may be returned for any reason by persons who have viewed any lots in person. Also see the following.
6. **Indian Peace Medals:** Even advanced experts on Peace Medals are unable to always positively differentiate original Indian presentation strikes and contemporary or later strikes for collectors. We guarantee all Indian Peace Medals to be struck from US Mint dies, and that they are not fantasy or replica pieces. We are unable to offer any further guarantees on these interesting pieces. Please note we have done careful research, and have provided full details on each.

7. Grading is an art, not a science. We have attempted to conservatively grade each item. The amount of grade description is proportional to the value. Please do not expect every minor flaw to be described on a VF \$10 token! Persons interested in subtle variations of grade should inspect the lots. Tokens and medals are not coins, graded on a MS scale! A "Choice Unc" token may and probably will have minor spots, micro-scratches, rub or wear on high spots and/or other minor problems visible with a glass. Exonumia is RARE in high grades. Sorry, no returns are generally allowed on the basis of minor grade opinion differences.
8. No tie bids, the earliest postmark gets the lot. Please bid in odd amounts: \$5.18 vs. \$5.00.
9. The Minimum bid on every lot is \$4.00. All bids in US funds.
10. We reserve the right to withdraw lots and reject unrealistic bids (although we seldom do so!). In a very few cases we have duplicates of a lot. We reserve the right to sell a duplicate in the same grade as the lot description to the underbidder.
11. **ALL BIDS REDUCED:** All lots will be sold to the highest bidder at a modest advance over the second high bid. Bids under \$20.00 will not be reduced nor will bids be reduced to under \$20.00. All bids over \$20 ARE reduced! Bids under \$5,000 are reduced to 10% over the second high bid. Bids over \$5,000 and under \$50,000 are reduced to 7.5% over. Bids over \$50,000 are reduced to 5% over the second high bid. No bids are reduced more than 50% and bids are not reduced below 90% of the low estimate. **We REDUCE your Bids!** Bid with confidence, as hundreds of bidders have done. By reducing your bids, we offer you the convenience of allowing you to bid your top bid, knowing we will reduce your bids as much as possible.
17. All lots will be sent to street addresses via United Parcel Service, up to \$900 value. Other addresses and high values will be sent by AIRMAIL Insured U.S. Mail (Max \$400) and REGISTERED (over \$400). Overseas bidders please send detailed instructions. Postage, insurance and packaging will be added to all lots. Specify alternatives (UPS Air, etc.)
18. Auction sales ARE NOT approved sales! All returned lots MUST BE MADE WITHIN FIVE DAYS of receipt. Your errors are your responsibility and ours are ours. The only legitimate reason for returning a lot is if it has not been correctly attributed. Any return must be insured for full value and reason for return given. No lots removed from the original holders may be returned for any reason. I do pay postage both ways for my mistakes (See above). There is NO RETURN of group lots or bulk lots of 5 or more items, which are sold AS IS.
19. If you are not sure what a lot is, please write or call for a rubbing or further information.
20. Time payments are available. Due to the need to pay consignors promptly, we do not encourage time payments, but we do offer this service to anyone requesting it in advance. No interest is charged on promptly paid accounts. Please follow these simple directions. Clearly mark your bid sheet requesting time payments. Send an advance deposit equal to one-third of your maximum limit (See No. 13) or equal to 20% of your total bids. After applying your deposit to your total winning bids, half of the balance will be due upon receipt of invoice. The other half will be due in 30 days. Lots will be sent upon receipt of full payment. No returns can be accepted, as consignors would already have been paid.
21. The Prices Realized are published (\$5). The top bid before reduction, the purchaser or other bidders are Strictly Confidential, and are never revealed.

SPECIAL SERVICES

12. Bidders may use the "Increase Boxes" to increase their bids by ANY percentage. This is a useful technique for advancing your mail bids as if you were bidding on the floor in competition with other bidders. It will only be used if necessary. Applies to bids over \$20 only.
13. **LIMIT BIDS:** Bidders may limit purchases by specifying the amount they wish to spend. Please list bids in the order of preference. Your bids will be executed in that order until the purchase limit is reached. Please feel free to bid up to eight times your limit amount.
14. **GROUP BIDS:** You may place one bid on any sequential number of lots, provided you also bid on each lot. The totals of the individual bids must equal or exceed the group bid. Your individual bids are ignored when figuring the group bid, but the group bid must exceed the sale total of the individual lots by the minimum increment.
15. **ONE LOT ONLY BIDS:** You may bid any amount on several lots, and specify only one lot. For example, if you only want one Indian Peace Medal, use this technique to bid different amounts on several lots, and only get one piece. Please mark your bid sheet carefully.
16. All lots are shipped upon receipt of full payment. We regret we are unable to make exceptions.
22. All invoices are payable within FIVE DAYS after receipt. Consignors want prompt payment! Past due accounts are subject to a Service Charge of 1 1/2% per month (18% annual rate).
23. Most photographs have been enlarged to show details. Please note they are not equally enlarged. Sizes given are usually in millimeters.
24. The Guide Price (\$XX) is to be used as a GUIDE ONLY. These estimates are based on my research and knowledge and are the estimated market prices. Please feel free to bid higher or lower. Bids will be reduced. A few lots are marked with a MINIMUM BID: (MB \$XX).
25. No deposit is required, unless specifically requested. References are desirable for new bidders.
26. Your comments on bidding rules, auction format and lot descriptions are welcomed. We have changed all areas over the years based on our customers' suggestions in order to serve you better.

Illinois Civil War Token Collection

215. **The Fuld Collection of ILLINOIS Civil War Tokens.** The fantastic and most complete collection of Illinois Civil War tokens possible. Includes many rare and UNIQUE pieces, over 80 OFF-METALS, other desirable pieces. The rare Alton is the Fuld Plate, a Brass Lodi is included, several unique Copper-Nickel strikes are unlisted, and much more. Virtually all of the Fuld Plate pieces are included, except where a better condition piece was obtained. This collection includes 32 Brass, 11 Nickel, 3 SILVER, 5 Zinc, 19 Silver-Plate, 2 White-Metal, 7 Copper-Nickel and 2 German-Silver pieces. Also included is over 5 over-strikes, including one fantastic piece struck obv and rev over a LARGE CENT. There are 21 R2, 29 R3, 23 R4, 32 R5, 21 R6, 28 R7, 48 R8, 76 R9, 15 R10 and 24 unrated pieces or varieties. There are over 310 different, with 5 minor duplicates. Many pieces are CHOICE UNC, with most in very high grades. This is the finest possible collection that could ever be assembled. Purchased in 1980 from the investor who acquired it from George Fuld. A rare opportunity to acquire the best! Over 315 pieces. (MB \$55,000) \$60,000-65,000+
This collection does not include the Fuld-listed Chicago pieces now attributed to Maryland.

The Kraft Collection

845. **The Kraft Collection of Wisconsin Civil War Tokens.** As one lot, the above collection of WI Civil War Tokens (lots 301-844). An incredible opportunity to acquire the largest and finest possible collection of WI CWT. With all the unique and excessively rare pieces in this collection, plus the incredible condition, it will be impossible to duplicate this at any price, once sold. In addition, the buyer may consign any duplicate lots to our next sale at a reduced commission rate. A once in a lifetime opportunity! \$115,000-125,000+

Duplicates & De-Listed Tokens from the Kraft Collection.

The following lots consist of duplicates and de-listed tokens. For example, Fuld listed many pieces on thick and thin planchets. While some are obviously noticeable, others are so close to "normal" pieces that it is difficult to differentiate them, even when side by side. When the cataloger was unable to tell the difference in thick and thin, they were de-listed. Also, in a few cases, Fuld, Watson, Hartzog and Kraft have not verified metal content. When in doubt, the cataloger has tested the edge, and several pieces have changed apparent metals. See the revised WI CWT catalog for complete comments on non-normal pieces and metal changes.

851. **WI 45A-5a R5 Baraboo: Peck & Orvis.** Partially lustrous AU, light brown, small spot rev. \$80.00-90.00+
Ex-Krause.
852. **WI 185A-5b R9 East Troy: C.W. Smith Brass.** Brass Off-metal. Listed as a variety with a double struck, off-center rev, but probably all like this. Unc, obv lightly toned, lustrous, minor spots, rev well toned. \$150.00-175.00+
Ex-Fuld/Watson/Hartzog.
853. **WI 300G-1b R6 Janesville: H.L. Smith.** Purchased as copper, but edge test reveals is actually brass. As this was the Fuld piece used for listing the G-1a (R9), it has been deleted. Choice VF/XF, appears copper. \$75.00-85.00+

American Indian Peace Medals

The history of the use of medallic art in negotiations between the American government and native American Indian tribes has its roots in the early colonization efforts of European settlers on the American continent. European exploration and expansion brought about an almost inevitable series of cultural conflicts which resulted in difficulties for native Americans, such as warfare between the cultures, the onslaught of previously unknown European diseases, conflicts over ownership of land, and religious differences. The need to resolve differences and settle disputes resulted in peace negotiations between the colonists and Indian tribes, with the granting of medals part of the settlement process.

While the New England Puritans and Middle Atlantic States mercantile classes tended to see native American peoples as obstacles to their westward expansion, French, Spanish, and Portuguese colonists adopted very different attitudes toward the natives they encountered. This was largely the result of the different reasons for, and historical processes involved in, their colonization efforts. The French, always outnumbered save in small and narrowly defined enclaves, found it necessary to cooperate with native peoples, whose friendship was needed for safe passage to the interior. Spanish and Portuguese attitudes were chiefly the results of their desire for conquest and later occupation.

The process of signing a peace treaty or acknowledging a pact of friendship, followed by the granting of medals in varying sizes, was characteristic of early English-Indian relations, and later American-Indian ones as well. A grand council was held after interpreters and envoys were dispatched to the native peoples. Speeches professing eternal friendship and sovereignties were exchanged, followed by the presentation of emblematic gifts by the European contingent. From an early time, these took the form of "Peace Medals." The name is something of a misnomer, since they were not actually medals struck to commemorate peace, at least in the beginning. Rather, they were medals bearing the likeness of the then reigning European monarch, with some other device on the reverse, usually a heraldic emblem of the monarch's family. The medal was, to a large degree, a physical expression of the power of the European monarch who was said to have personally recommended its bestowal.

Attitudes toward the "peace" medals mirror the differing attitudes toward the peace process in the minds of the two parties. The Europeans looked upon the medals they distributed as badges of allegiance, while the native people saw them as pledges of assistance and good feeling. Medals were also used as tokens of esteem and as rewards for services rendered. For example, a great medal of John Quincy Adams was presented to a Chippewa Indian for saving the life of an American government official threatened with drowning. Some recipients of great medals received annual stipends, but from a political point of view perhaps the most important "benefit" of the bestowal of a great medal was the recognition by the European grantor that the grantee was the spokesman for his people, the one with whom treaties were negotiated, as well as the one to hold personally responsible for any abrogation of those treaties.

Among the earliest medals are those of Charles II and Louis XIV. The active presentation of medals of varying types more properly characterizes the reigns of George II, George III, and later, Victoria, on the British side. On the American side, the earliest p73 medals are the oval engraved silver George Washington pieces, followed thereafter by medals from nearly every presidential office holder. Following the use of the engraved pieces, most of the Washington pieces were struck in

England during his second presidential term. This Washington design featured an agricultural and a domestic scene, which became popularly known as "Season" medals. The medals did not arrive until the administration of Adams, who used them instead of ordering personal medals. The supply of Season medals lasted until as late as 1806, when they were used by Lewis and Clark.

Medals came in varying sizes. The largest were granted to the "Great Medal Chiefs," their size symbolic of the importance of the recipient. Smaller medals were awarded to native leaders considered of lesser importance, for whatever reason. In the United States Peace Medal series, as well as the British, the smaller sized medals are often rarer today than the larger issues. The first large oval silver medals issued by the Washington administration (c. 1789) were hand inscribed with his name and a design intended to symbolize peace and friendship between the two cultures. By 1792, the design had been changed to include Washington in a posture of friendship with the Indian chief.

The change of the medals to the older European style after the individually engraved Washington oval medals is of some interest. Father Francis Paul Prucha, in his *Indian Peace Medals in American History*, suggests that the Federalist administrations, under attack for monarchic tendencies, shied away from the more regal bearing of the European medals. This reason is undoubtedly partially responsible for the original choice of style for American peace medals. However, it is also true that until the establishment of a national mint, the government did not have the technical ability, nor the engravers, to produce a quality product. America was striving to be a world power, even at this early date, and one of the first concerns of the Congress was establishing a mint and issuing currency. When this was accomplished, America had the capacity to imitate more closely the medals produced in Europe. Although proudly aware of its newly-won freedom from Old World restraints, Americans continued to model and judge themselves on the basis of their European heritage. It was only natural for them to use the image of their freely-elected leader on their national symbols. With the exception of John Adams, who used the Season medals ordered by Washington, the tradition was maintained as each new president came into office. Continuing through the administration of Benjamin Harrison, in 1889, the Indian peace medal carried the image of the Great Father in Washington. In the 1840's, special Adams medals were struck to complete the presidential series. The design decision proved to be a good one, as for all appearances the Indians cherished the new full portrait of their Great White Father.

The concepts of the Manifest Destiny doctrine provided the impetus that would bring Americans across the continent to the Pacific. The expeditions of Meriwether Lewis and William Clark, 1804-1806, was the beginning of the attempt to fill the power vacuum left by the French, Spanish, and British in the immense interior. These expeditions were well equipped with peace medals. Their inventory indicated three large-sized Jefferson medals; 13 second size; 16 third size; 55 of the fourth size (Washington Season medals); and a few additional pieces. These medals were awarded by Lewis and Clark with great ceremony, usually including gifts, certificates, flags, clothes, and the firing of guns. In p73 their desire to make friends for themselves and their country, Lewis and Clark did not practice the restraint of the early Europeans, who awarded fewer medals, with the attendant honor being proportionately greater. With their saturation method, and failure to record who among the Indians they made medal chief, they started a tradition regrettably followed by other explorers and eventually by the Bureau of Indian Affairs as well.

A tradition was set with the minting of the Jefferson medals, and remained such for many years, bringing back the round shape and style of the European pieces. The obverse featured a portrait of Jefferson; the reverse showed the clasped hands of Indian and settler, the legend PEACE AND FRIENDSHIP, and a crossed tomahawk and peace pipe. In the 1830s and 40s, the issuing of the Indian Peace medals gained the status of an official government tradition. Moritz Furst, already a well known medalist, produced the obverse dies for the medals of James Monroe, John Quincy Adams, Andrew Jackson, and Martin Van Buren. For over fifty years the reverse remained the same, then changed dramatically during the administration of Millard Fillmore. The traditional clasped hands were replaced by a white American figure and an Indian wrapped in a blanket, standing in front of the American flag backdrop. The background of plow, ax, and farm recall the earliest Washington oval medals. PEACE AND FRIENDSHIP was replaced by LABOR, VIRTUE, HONOR. The dies were cut by Joseph Willson and Salathiel Ellis, who also made the medals for Franklin Pierce.

The medals issued by James Buchanan displayed yet another reverse by Willson and Ellis, showing a central figure of an Indian farmer against an encircling image of a scalping scene. The Lincoln administration used the same reverse. The Andrew Johnson medals were designed by Anthony C. Paquet, and yet another new reverse was brought into the Indian Peace medals. Grant's was also done by Paquet and removed all but a slight hint of Indians, leaving a small peace pipe.

The Indian in headdress reappeared for the Rutherford B. Hayes medals, engraved by George T. Morgan. His oval peace medal design of the settlers pointing out the advantages of white society to the Indians lasted until the final issue under Benjamin Harrison.

Interest in the Peace Medal as a numismatic item began in 1842 when bronze restrikes of the official medals were produced under the direction of Robert M. Patterson. He became more interested in the numismatic tradition of a national series of strikes than he was with the use and symbolic meaning of the medals themselves. Patterson ordered the Tyler medals and tried using a portrait lathe to cut the dies rather than a die engraver. This was received well in Washington, as he was able to mule a John Adams set of dies, to correct an omission and complete the presidential series that laid vacant for nearly fifty years.

Archival records indicate that the practical concerns of the period far overshadowed the symbolism that the Indian Peace medals represented. The most important aim was who would be the engraver of the Great Father's portrait. It was not certain that the Mint could or would produce the medals or even which office in Washington should be responsible for ordering them. The only thing certain was that the agents for Indian affairs continually requested medals and the supply was always late in arriving on the scene. This was a strong indication of the decreased importance that both Indians and Washington placed on the medals. Unfortunately their increasing use as rewards p73 for favors or for good behavior lessened their impact as symbols of leadership. This was obvious to many of the more experienced agents and exploration leaders. Traders began to distribute unofficial medals as the move West of the Missouri River took hold. Chiefs and tribal leaders soon laid aside their medals as the younger, non-influential tribesmen acquired the unauthorized medals from traders who sold or gave them easily.

The Indian Peace medal had declined in use by 1896. Reasons for this were many, yet one anecdote describes the disregard dramatically: An Oto Indian in 1887 petitioned the President for a medal, asserting that he was indeed an Indian and not a half-breed, had always been friendly to the white man, was a Catholic, and was certain to be authorized a medal. He did receive his peace medal, but under one condition; he would be required to reimburse the United States Government the sum of \$10.71 for the cost of its production!

The Dr. Bridge Collection of

Silver Indian Peace Medals

History of the Collection

We are fortunate to be able to offer 23 Silver Indian Peace Medals. This group represents the largest offering ever at mail bid sale of US Mint Silver strikes. The Dreyfuss Collection had 22, the Garrett sale offered 16, while the Schenkel sale had only 13 US silver medals. In addition to being the largest offering, the silver ovals represent a major discovery, a completely new type of medal, previously unknown to collectors.

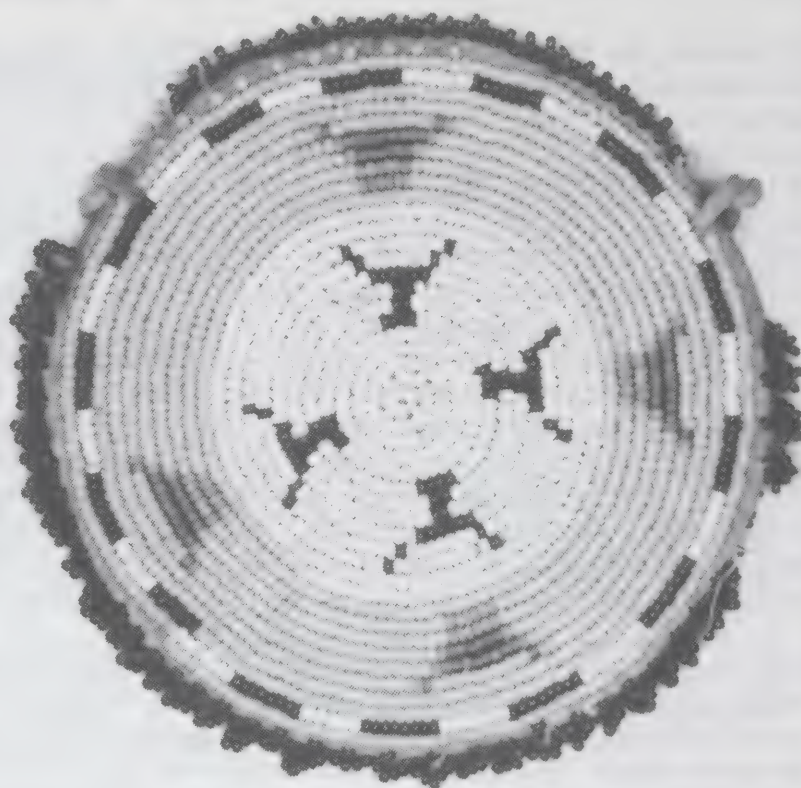

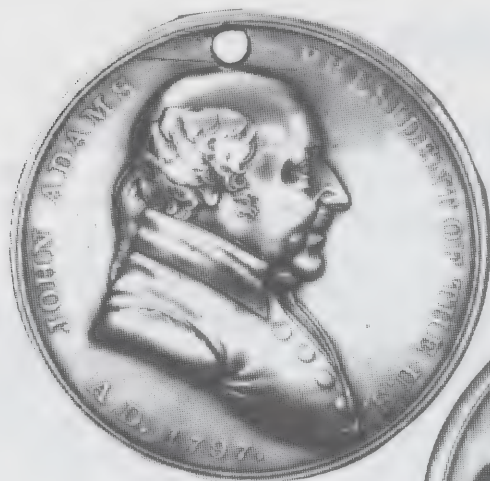

Most of these are originally from the collection of Dr. William C. Bridge, of Elgin, Illinois. Dr. Bridge was a serious collector of Lincoln items and Indian Peace Medals, acquiring a fantastic collection of excavated and purchased items. The consignor's father, born in 1889, became interested in looking for arrowheads at age 10, digging in the local Indian camping grounds in Elgin. He became more interested, and developed a friendship with Dr. Bridge, the local expert on Indian artifacts. About 1908 Dr. Bridge gave his medals and Indian relic collection to the young collector. Upon passing away recently, the collector's daughter has consigned her father's large collection of Indian relics to a noted Ohio auctioneer, and the silver Peace Medals to this sale. We were also fortunate to obtain several other silver pieces for this sale. Please note some of the following medals are genuine, original silver strikes for Indians, and others are collector strikes.

The American Numismatic Association Authentication Bureau has certified 8 pieces as original and genuine. The photographic certificates will accompany each certified lot. Due to the six month certification time, the other pieces were not sent to ANAAB. However, these have all been examined by noted authority John J. Ford Jr. He has carefully examined each piece (other than the modern restrikes), and his comments have been generally incorporated into the descriptions. Many of these have never appeared at public sale, with the oval pieces being completely new and previously unseen.

The specific gravity of these medals was done by ANAAB and Dr. F. Duane Ingram, of Rock Valley College (RVC). The accepted specific gravity value of silver is 10.492. The uncertainty of the measurements and surface oxidation accounts for the slight differences. When checking various sale catalogs, I was surprised to find none gave the specific gravities, and some obviously measured the medals with an inaccurate scale. We suggest that a specific gravity is a simple test that should be done on any "silver" Indian Peace Medal prior to sale. All silver Indian Peace Medals are rare and quite desirable. The genuine, original medals show signs of use, from being worn and handled. As some of these are similar in toning, it has been suggested they may have been cleaned years ago. As many of these pieces have never previously been offered for sale, it is difficult to suggest accurate estimates. Consequently, estimates are provided only for pieces with recent sales. These important medals are sold without reserve and your bids at any level are welcomed. All bids ARE reduced, as competitive bidding allows.

History of American Indian Peace Medals Acknowledgements:

Parts taken directly from the Garrett and Shenkel auction catalogs, by Bowers and Merena. Other portions from Julian, Prucha and Belden.

1051. **IP-1 John Adams Silver, 1797.** By Moritz Furst. None were specifically struck for Indians in any metal. However Belden states at least one "...shows evidence of wear, and was probably given to some Indian." Apparently all were struck after 1846, as the reverse die was made then. Struck with Type I reverse, probably struck late 19th century. Silver, 51.05mm, 2.8mm thick, original top hole for suspension, 69.12gr, 10.47 specific gravity (RVC). Lightly toned VF/XF, some light scratches in fields, minor damage above bust. Original matte finish, polished.

My 1986 Price Guide had only two records, one questionable, and a \$10,000 value. None in Garrett, Dreyfuss or Schenkel. Rare.

1052. **IP-5 James Madison Silver, 1809.** By John Reich. The large 76mm size, for presentation to Indian Chiefs. First reverse. Prucha 40, Belden 20. Silver, 75.2mm, 3.4mm thick, original top hole for suspension, but lacking the loop, 164.09gr, 10.46 specific gravity. Lightly toned VF, some minor nicks and signs of wear. The James Madison was the first solid silver medal produced by the Mint, engraved by well-known diesinker John Reich, under the supervision of John Vaughan, a prominent Philadelphia merchant and patron of the arts. Vaughan was an agent for the War Department. Although Madison was in-

augured in March of 1809, these dies were not finished until December of 1814. While 112 were struck, only a few examples are known to exist today. My 1986 Price Guide listed 15 transactions over the past century. The Schenkel sale suggests the existence of six specimens (11/90). This choice example would then be the seventh known, superior to the Schenkel piece.

..... \$9000.00-10000.00+
From the Dr. William Bridge Collection. ANAAB #AB0128, certified genuine and original. Missing in the NY Library and Kessler-Spangenberg sales, only a 62mm in the Garrett sale. The 1986 Dreyfuss piece brought \$9350. Color Cover Photo.

1053. **IP-5 Case Original Beaded Carrying Case.** Round, multi-colored, finely beaded leather carrying case for a large silver Peace Medal. With four leather draw-strings, two on either side. While the Madison medal was in this case, it is possible the case does not date that early. Probably dates to about 1880. With a purple 36" ribbon, ca. 1850-1860. About VF, some beads missing at edges, great color! \$1000.00-2000.00+
The consignor states her father was especially proud of this case, and refused many purchase offers. We are not aware of any other cases, and regard this as a rare opportunity to acquire a fabulous display piece. See color cover photo.

1054. IP-9 James Monroe Silver, 1817. By Moritz Furst and John Reich. The middle size medal for presentation to Indian middle chiefs. First reverse. Prucha 41, Belden 24. Silver, 62.2mm, 2.8mm thick, original top hole, 100.91gr, 10.5 specific gravity. Worn Fine/Very Fine, the usual signs of wear and contact marks by its original recipient. Only 100 struck, with few known today. \$7500.00-8000.00+
From the Dr. Bridge Collection. ANAAB #AB0129, certified genuine and original. The Schenkel specimen sold for \$7975, last November. Color Cover Photo.

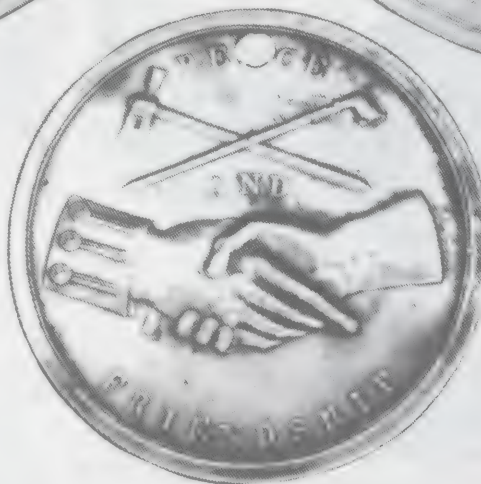

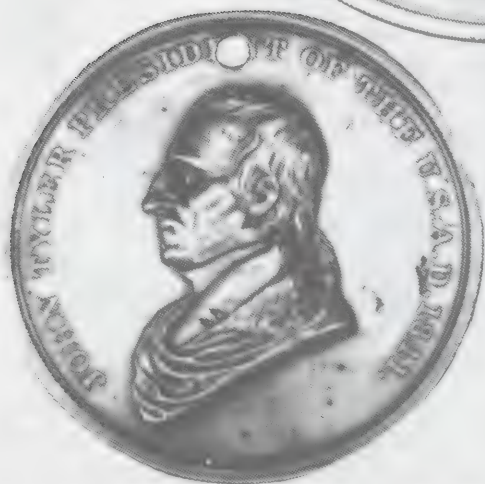

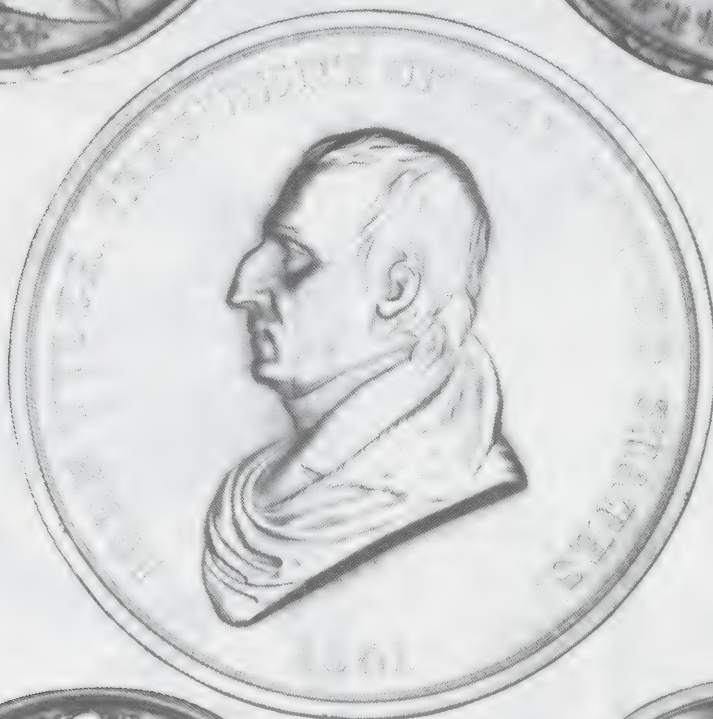

1055. IP-13 John Quincy Adams Silver, 1825. By Moritz Furst and John Reich. The middle 51mm size for presentation to Indian middle chiefs. Silver, 50.8mm, 3.2mm thick, with original top hole for suspension, 71.26gr, 10.46 specific gravity. Belden 28. Struck with first reverse. Obverse bust right, legend; reverse clasped hands. Choice XF, proof-like. Some reverse die rust, obverse pitting marks, some tiny marks in fields. Only

48 original pieces were struck. Presumably an original, but could be an early official restrike for the Indian Office.

My 1986 Price Guide shows only three transactions, with a \$5000 price. Not in Garrett, Dreyfuss or Schenkel. Similar in fabric to the following Andrew Jackson medal.

1056. IP-16 Andrew Jackson Silver, 1829. By Moritz Furst and John Reich. The 51mm size for lesser Indian Chiefs. There were 71 original pieces struck. Silver, 51.1mm, 3.1mm thick, original top hole for suspension, 70.66gr, 10.50 specific gravity (RVC). Belden 31. Struck with Type I reverse. Lightly toned, Choice XF, proof-like fields. Faint obverse die rust. Presumably an original, but could be an early official restrike for the Indian Office.

My 1986 Price Guide lists only 4 transactions, with a \$4500 value. The Garrett F/VF piece brought \$3750. Similar reverse die state as previous Adams.

- 1057. IP-18 Martin Van Buren Silver, 1837.** By Moritz Furst and John Reich. The middle 62mm size struck for middle Indian Chiefs. One of 112 original strikes. First reverse. Prucha, page 106, Belden 33. Silver, 61.8mm, 2.7mm thick, original top hole for suspension as issued, 93.82gr, 10.5 specific gravity. Struck from the first reverse die. About VF, but with numerous nicks, rim dings and other field contact marks.

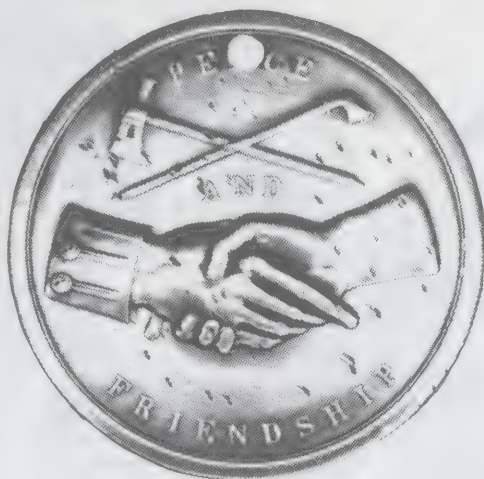

..... \$7000.00-7500.00+
From the Dr. Bridge Collection. ANAAB #AB0130, certified genuine and original. The well worn "About Fine" Dreyfuss specimen, damaged (the ear was recut!) and retooled, brought \$6600. Very rare, missing from most collections. Prucha states 106 were struck in 1837 and 1838. My 1986 Price Guide lists 12 transactions known over the past century.

- 1058. IP-21 John Tyler Silver Restrike.** The large 76mm size. Struck in the mid-twentieth century, with matte, sand-blasted surfaces, with dull edge. Silver, unholed. Choice AU+, matte, dull patina, edge mottled. Much rarer than the pre-1900 strikes.

..... \$750.00-1000.00+
One of the Ed Rice strikes.

- 1059. IP-22 John Tyler Silver, 1841.** By Ferdinand Pettrich and John Reich. The small size for lesser Indian Chiefs. There were 100 original pieces struck. Struck from Type I reverse. Prucha 45, Belden 37. Silver, 51.1mm, 3.3mm thick, original top hole for suspension, 67.18gr, 10.48 ANAAB specific gravity, 10.49 (RVC). Choice VF/XF, some light scratches, one ding by "A.D.", other abuse. Traces of die rust.

From the Dr. Bridge Collection. The ANAAB replies: "While staff feels (this is) most probably genuine, consultants have suggested caution in certifying these as they would create an undocumented precedent. More research would be required to certify them." By JP Martin, ANA. Despite the above ANAAB comments, we suggest this is a US Mint 19th century restrike in silver, and was most likely sold to a collector. Our 1986 Price Guide lists a \$4500 price, on seven records over the past century. The Dreyfuss medal was miscataloged, and was actually IP-22, not 62mm.

- 1060. IP-26 James K. Polk Silver, 1845.** By John G Chapman and John Reich. The small lesser Indian Chiefs medal. Prucha 46, Belden 40. Silver, 51.2mm, 3.3mm thick, 68.33gr, 10.47 specific gravity (RVC), original top hole for suspension. Struck from Type I reverse, traces of die rust. Lightly toned VF/XF, some light dings and abuse, mostly in fields, obv and rev. A nice example of the rare small Polk in silver. According to Prucha, while 100 of this size were struck, 94 were melted in 1849 for the Taylor Peace Medals. Consequently, the small size Polk is one of the two most difficult of the series to obtain.

My 1986 Price Guide lists only 5 transactions recorded over the past century, probably on only a couple of specimens. The Dreyfuss piece brought \$9240. An early 19th century strike.

- 1061. IP-29 Zachary Taylor Silver, 1849.** By Henry K. Brown and John Reich. The small size for lesser Indian Chiefs. Only 49 original pieces struck. Silver, 51.2mm, 3.3mm thick, original top hole for suspension, 70.14gr, 10.5 specific gravity (RVC). Struck from Type I reverse. Belden 43. About VF/XF, but with numerous dings, high points scraped, file marks, abuse. This type in silver never previously seen by Mr. Ford.

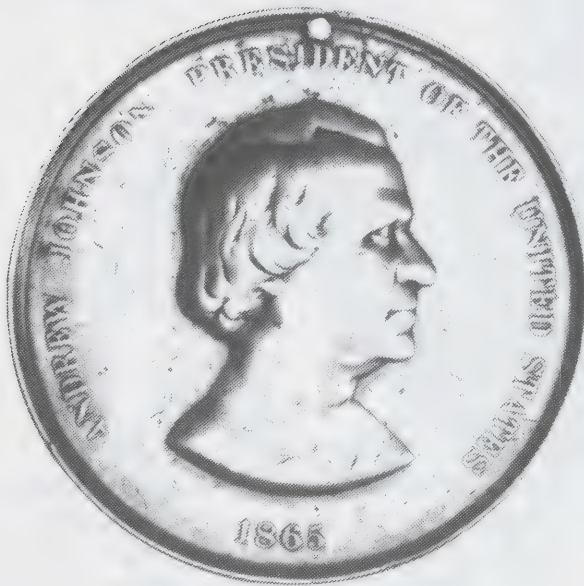

Not in Garrett, Dreyfuss or Schenkel. My 1986 Price Guide lists 7 transactions on only two specimens, with a \$5750 value. Similar in fabric to the previous Polk and Tyler, an early 19th century strike. Rare.

- 1062. IP-31 Millard Fillmore Silver, 1850.** By Salathiel Ellis and Joseph Willson. The obverse legend is plainly double struck on left side. Apparently from the original dies, with pronounced doubling in Willson's name in the reverse exergue. Prucha 48, Belden 47. Silver, 62.7mm, 3.6mm thick, small original top hole as made for suspension, 86.72gr, 10.49 specific gravity. Toned VF, some minor contact marks in fields, double struck. Interestingly, no small size Fillmore medals were struck, with just the 76 and 63mm sizes issued. The reverses for the Millard Fillmore medals are a departure from the standardized clasped hands reverse previously seen. On the Fillmore and following Pierce medals, the reverse scene pictured is that of a farmer pointing to the American flag. He stands facing an Indian, presumably he is instructing in the virtue of "Labor, Virtue, Honor", the legend above. Behind him is a scene of settled agriculture. The obverse and reverse were engraved by artists not connected with the Mint. As a further departure from then established practice, the dies were sunk by hand, rather than using the Contamin lathe. The Millard Fillmore medals were delivered to the Commissioner of Indian Affairs in June of 1851, almost exactly one year after Fillmore became President. . \$7500.00-8000.00+
From the Dr. Bridge Collection. ANAAB #AB0132, certified genuine and original. Very rare with only 7 specimens recorded in my 1986 Price Guide, although Dreyfuss suggests 10 pieces. The original mintage was about 160 pieces. Superior to the 11/90 Schenkel Fine specimen, which realized \$7975. The Garrett piece brought \$6500.

- 1063. IP-32 Franklin Pierce Silver, 1853.** By Salathiel Ellis and Joseph Willson. The large Indian Chiefs medal. One of the 97 pieces from the net original mintage. The tall, close date, original obverse variety. Silver, 75.4mm, 4.2mm thick, original top hole for suspension, 152.03gr, 10.5 specific gravity. Belden 48. About Fine/VF, fine contact marks in fields, one rim ding rev top. \$5000.00-6000.00+
From the Dr. Bridge Collection. ANAAB #AB0133 certified genuine and original. My 1986 Price Guide shows 10 transactions on 8 or fewer specimens. Not in Dreyfuss or Schenkel, the Garrett specimen brought \$3250. Color Cover Photo.

- 1064. IP-34 James Buchanan Silver, 1857.** By Salathiel Ellis and Joseph Willson. The large Indian Chiefs medal. Silver, 75.5mm, 4.5mm thick, original top hole for suspension, with thin silver ring which is possibly not original, 178.75gr, 10.496 specific gravity. Prucha 50, Belden 50. Choice VF, with top ring, rev scrape marks on arm of right Indian, rev rim scraped lower left. The new reverse used on the present medal and the following Lincoln medal shows a central vignette of a rural scene with children playing baseball behind Indian plowing, scalping scene above. \$7000.00-8000.00+
From the Dr. Bridge Collection. ANAAB #AB0134, certified genuine and original. Only 69 pieces struck, missing in Garrett, and rare. My 1986 Price Guide lists only three transactions. The Schenkel VF piece realized \$7150. From the photograph, the Schenkel piece is somewhat more worn than the present medal. The Dreyfuss piece had portions of the reverse fully removed.

- 1065. IP-38 Abraham Lincoln Silver, 1862.** By Salathiel Ellis and Joseph Willson. Silver, proof-like fields. The large 76mm Indian Chief medal. The Lincoln is perhaps the most popular Indian Peace Medal, next to Washington. The first reverse die broke after only eight strikes. This new reverse die was prepared without the engraver's name. Probably struck in 1863. There were 92 originals struck with the new reverse die. The obverse depicts Lincoln facing right, inscription around, 1862 date below. The reverse is a scene of a Indian plowing a field, with a baseball game between four children in the background. Prucha 58, Belden 52. Silver, 76.0mm, 5.0mm thick, original top hole for suspension, 205.22gr, 10.5 ANAAB specific gravity, 10.51 RVC. XF, some obverse die rust, traces of reverse die rust. Similar to the proof Garrett piece, with clean fields, deep toning and minor wear on high points. With probably original top split ring. \$7000.00-8000.00+ The Garrett piece realized \$7500, and the VF Shenkel specimen \$7150. ANAAB reports: "While staff feels (this item is) most probably genuine, consultants have suggested caution in certifying these as they would create an undocumented precedent. More research would be required to certify them." We suggest this is a US Mint strike in silver, and was most likely sold to a collector, not given to an Indian, like the Garrett collector specimen. One of only two known of similar fabric, the other in the Ford Collection, ex-Boyd. Rarer than the original strike!

- 1066. IP-41 Andrew Johnson Silver, 1865.** By Anthony C. Paquet. Rev Bust of George Washington. The medium size for middle Indian Chiefs. Prucha 52, Belden 56. Silver, 62.25mm, 4.8mm thick, small original top hole, but missing original swivel ring, 93.31gr, 10.506 specific gravity. Pleasing F/VF, minor signs of wear by its original recipient, with some scratches around top hole, numerous minor nicks. \$5500.00-6000.00+ From the Dr. Bridge Collection. ANAAB #AB0136, certified genuine and original. One of about 90 specimens struck. While the same number were struck of the larger 76mm size, this is rarer. Missing from the Garrett and Steinberg sales. The VF Dreyfuss medal brought \$5720, while the Schenkel piece realized \$6325, with original top loop. Color Cover Photo.

One Lot Only

Do you want to increase your chances for success? You may bid any amount on several lots, such as the Indian Peace Medals, and specify only one lot. Please mark your bid sheet carefully.

1067. IP-42 Ulysses S. Grant Original Silver, 1871. By Anthony C. Paquet. Silver, 63.0mm, 4.1mm thick, original top hole for suspension, 98.38gr, 10.43 specific gravity. Prucha 53, Belden 57. The obverse depicts Grant facing right, with a peace pipe and olive branch below. The reverse features a globe with Bible above and agricultural instruments below. This is an example of the 1871 original variety, not one of the heavier official restrikes from the 1880's. Choice XF, some minor contact marks, rim dings and signs of wear by its original recipient.

..... \$1850.00-2000.00+

From the Dr. Bridge Collection. ANAAB #AB0137, certified genuine and original. One of the 300 original pieces struck by Paquet. The only silver Indian Peace Medal sold to collectors, and the most affordable piece. Based on the general wear and minor marks around the top hole, this specimen was undoubtedly used by an Indian. The XF Schenkel medal realized \$1980.

1068. IP-42 Ulysses S. Grant Silver Restrike. As the previous lot, but a silver restrike. Struck in the mid-twentieth century, with matte, sand-blasted surfaces, with a bright edge. New collectors to the series should study the differences, as they are quite obvious, but may fool the uninitiated. This is not one of the 1880's restrikes, but is more modern. Actually this restrike is much rarer than the 1871 and 1880's strikes. Also see Hayes restrike for a similar piece. Silver, unholed. Choice Unc, matte, dull patina with shading around devices. . \$750.00-1000.00+ Purchased at the 1991 CSNS Convention.

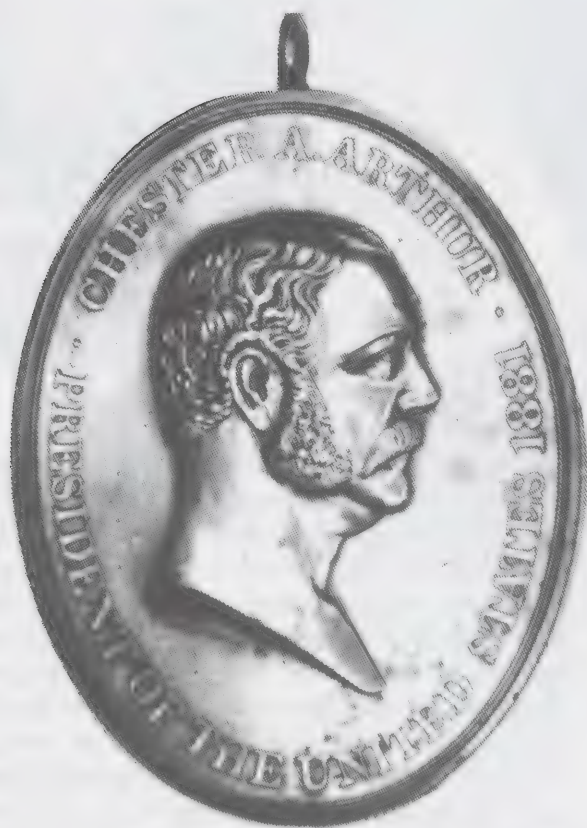

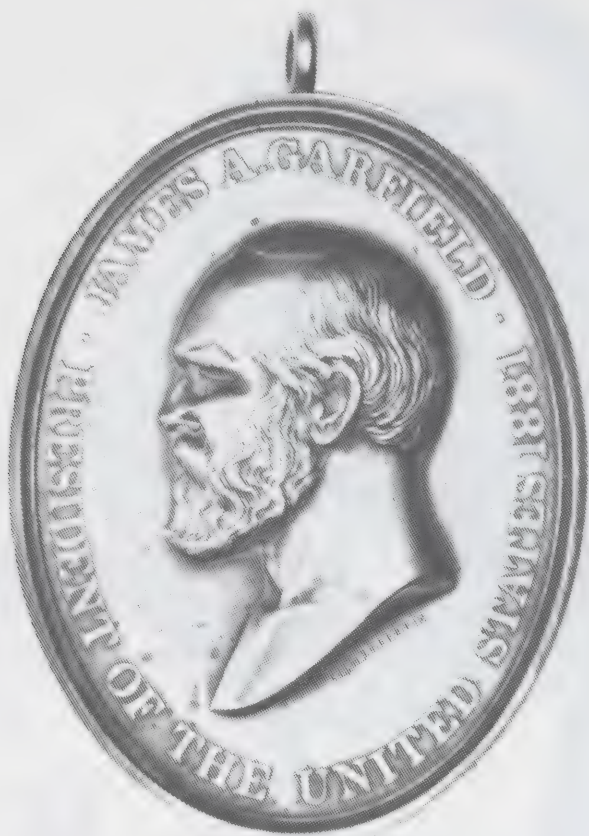

1069. **IP-43 UNIQUE Rutherford B. Hayes Oval Silver, 1877.** By George T. Morgan. Silver, 59.5x75.5mm oval, 4.9 to 5.6mm thick, 191.17gr, 10.40 specific gravity (RVC). Large top loop soldered to top of medal, perpendicular to medal. Choice XF, lightly toned, slight wear on high points. Partial wire edge. Struck from original reverse-dated 1877 die, some reverse die rust. The piece pictured in Julian is from the restrrike dies, made in June 1879. Belden 58. Obverse bust left, legend around. Reverse scene of a farmer showing an Indian Chief the benefits of civilization, with wreath encircling a crossed peace pipe and tomahawk. The Arthur Medal pictured in Belden has a similar top loop, although it appears to be somewhat smaller than the loops on these ovals. It has been common knowledge that no silver Hayes medals were struck from the original dies. This new discovery piece should be of great interest to students of the series. This original reverse has the date 1877 at top, with restrikes missing the date. This is the first medal in silver to appear with the correct reverse, and as such, has never been seen by Mr. Ford. The following lot is a modern silver strike from the dateless, restrrike dies. This medal with the correct reverse in silver is consequently rare and previously unknown. The Dreyfuss sale offered a silver Arthur, presumably one of the 6 original strikes. These five ovals are substantially heavier than that piece. Also, the specific gravities of 10.4 suggests silver, but the standard for silver is 10.492. Mr. Ford, noted specialist in Silver Indian Peace Medals, suggests these ovals may have been struck on cast planchets. It was common practice to cast planchets when small quantities were needed, rather than going through the lengthy process of rolling ingots out into strips.

Ford suggests "Rolled planchet?" for this specimen. These ovals show signs of double striking, with all having pronounced high wire rims. Wire rims are rarely if ever seen on silver medals for presentation to an Indian, as the rim would quickly be damaged. Consequently, these were undoubtedly struck for a collector, such as Dr. Bridge. It is quite interesting to note that no other similar pieces have shown up in the past century. As the new reverse die was made in 1879, this piece was presumably made prior to that time. However, the similar fabric with the following pieces obviously struck later, does create a mystery! While these ovals appear to be struck at about the same time, this 1877 reverse piece must have been struck prior to June of 1879, unless the original 1877 reverse die was not in fact damaged, but only replaced, and consequently was available at a later date. An interesting puzzle!

The five oval medals (with the exception of the following restrrike) are virtually identical in appearance and fabric. Four have the heavy silver top loop (which varies in size), with the fifth piece holed. This suggests they were probably struck at the same time. However, Ford states the Garfield is from a later reverse die state than the Harrison. He suggests these were probably struck around 1890-95. All silver ovals of any kind are of extreme rarity. Extremely rare, probably unique!

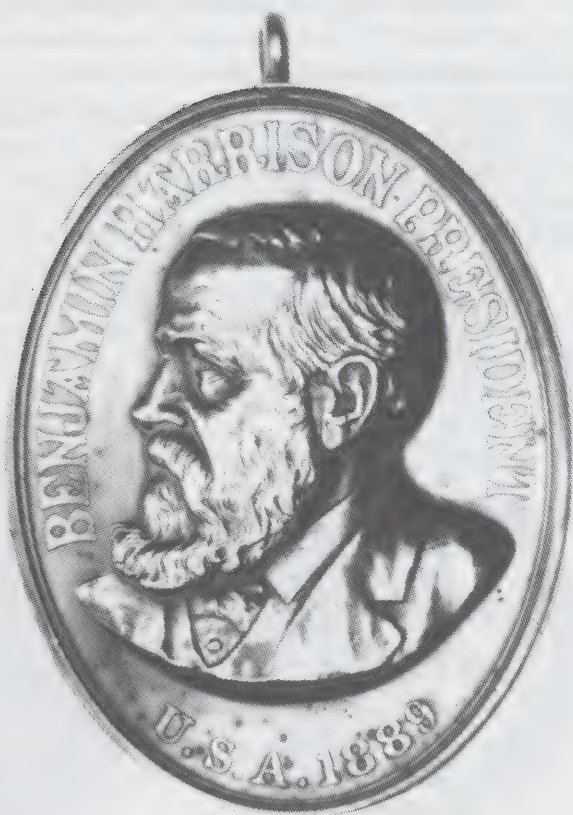

1070. **IP-43 Rutherford B. Hayes Oval Silver Restrike.** As the previous lot, but a silver restrrike from the second undated reverse die. Probably struck mid-twentieth century, obviously for a collector. Choice Unc, with matte, sand-blasted surfaces, dull patina with shading around devices. As the previous Grant restrrike. \$750.00-1000.00+
Purchased at the 1991 CSNS Convention.

1071. **IP-44 James A. Garfield Oval Silver, 1881.** By Charles Barber and George Morgan. Silver, 59.4x75.6mm oval, 6.5 to 7.4mm thick, 195.80gr, 10.38 specific gravity (RVC). Heavy loop soldered on top perpendicular. Belden 59. Choice XF, lightly toned, very slight wear on high points, matte fields. Almost complete wire edge obv and rev, high and pronounced obv top 3/4. Similar to the Hayes, obverse bust left, similar reverse, but undated. The second piece in this interesting oval medal series, also with a heavy top loop. This and the following three pieces are all struck from the same reverse die. All have a small, thin "S" in the field between the chimney and settler's head.

Only two original pieces in silver known, one in Ford Collection. As noted above, from a later die state than the Harrison. Ford states "Cast Planchet?" for this specimen. Extremely rare, probably unique!

1072. **IP-45 Chester A. Arthur Oval Silver, 1881.** By CE Barber. Silver, 59.5x76mm oval, 6.9mm thick, 196.60gr, 10.41 specific gravity. Large top loop attached perpendicular to top of medal. Belden 60. Choice XF, lightly toned, slight cabinet rub on high points. Almost complete high wire edge. Traces of obverse die rust, some micro-holes as if struck from a cast planchet. As previous, obverse bust right, same reverse, with "S". *Extremely rare, probably unique! Only one known original silver, sold in Dreyfuss for \$16,000. Ford states "Cast Planchet" for this specimen.*

1073. IP-46 Grover Cleveland Oval Silver, 1885. By Charles Barber and George Morgan. Silver, 59.4x75.5mm oval, 6.3 to 7.5mm thick, 193.98gr, 10.39 specific gravity (RVC), top hole. Belden 61. Choice XF, lightly toned. Almost complete wire rim, pronounced obv left, complete on rev. Dull surface. Similar to previous, bust right, same reverse die, with "S".

Ford states "Probably on rolled planchet". Extremely rare, probably unique

1074. IP-47 Benjamin Harrison Oval Silver, 1889. By Charles E. Barber and George Morgan. Silver, 59.4x75.5mm oval, 5.7 to 6.6mm thick, 193.75gr, 10.40 specific gravity (RVC). Heavy loop on top perpendicular to medal. The smallest loop of the four ovals. Double struck, faint outlines of letters and numbers visible to left of "U.S.A. 1889". Belden 62. Choice XF, lightly toned. Almost complete wire rim, pronounced obverse right, reverse top. Light reverse die rust, heavy silver oxide. As previous, obverse bust left, same reverse die with "S".

Julian states none of the Harrison pieces was issued in silver or bronze to Indians; all were made and sold to collectors. Ford states "Rolled Planchet?" for this specimen. Extremely rare, probably unique!

1109. **ALASKA Die Trials: Anchorage.** These interesting die trials were discovered in a large consignment, mixed in with other state trade checks, loose. There are only a few duplicates, mostly unique. Obviously, the striker made no effort to deceive collectors, as they are on the wrong metals, with wrong reverse, or uniface. Due to the interest in Alaska tokens and the rarity, full details have been given. The consignor stated he has had these for over 20 years, and no others have turned up in that time. While a number of Alaska token dies were discovered a few years ago, it is unknown if these are from those dies. Most are not fully struck, some with part of the inscription faint or missing. All are AU-UNC, are marked "Die Trial" in the description, and are sold as is, no guarantee and no return. While estimates are not included, we expect active bidding on these interesting patterns. "Good For" is abbr "GF", and "in Trade" IT. Anchorage: Fourth Ave Liquor; GF/25c/IT (Different die, smaller cents sign). AL, 26mm.
